

# Activity: Communication Scenario

*Edwina is 85 years old with a history of osteoarthritis, cardiac failure and mild stroke. She wears glasses and hearing aid, walks with a wheelie walker and requires assistance toileting. She returned from hospital yesterday where she he had a colonoscopy.*

*You notice that Edwina is unsteady on her feet and keeps getting up to go to the toilet without using her wheelie walker or asking for help today. She seems to be very restless and anxious about getting to the toilet.*

What signs of deterioration is Edwina showing?
