

# Activity: Resident Scenario

*Edwina is 85 years old with a history of osteoarthritis, cardiac failure and mild stroke. She wears glasses and a hearing aid. Edwina is cognitive, just forgetful at times, walks with a wheelie walker, and needs assistance to go to the toilet. She is frail and thin.*

*Edwina has not been drinking or eating much in the last day and the PCW looking after her has informed you using CUS. You note that she has a dry mouth, making talking difficult. She is tired and has little energy. Constipation was an issue, but her bowels have opened in the last two days with the use of aperients.*

What signs of deterioration are there?
