

EDDIE ⁺ Deterioration Parameters		
NORMAL	CAUTION	SERIOUS / LIFE THREATENING
Seek medical review of complaint or issue	Seek medical review of complaint or issue <u>Increase frequency of monitoring</u>	URGENT MEDICAL REVIEW REQUIRED <u>Do not leave the resident unattended</u>

EDDIE ⁺ Deterioration Parameters			
HEART RATE (BEATS/MIN)	50 - 100	40 - 49 or 101 - 130	<40 or >130
SYSTOLIC (mmHG)	110 - 180 <i>(or range specified by GP for resident)</i>	90 - 109 or 181 - 200 <i>(or higher in well resident)</i>	<90 or >200 symptomatic
RESPIRATORY RATE (BREATHS/MIN)	10 - 24	6 - 9 or 25 - 30	<6 or >30

EDDIE ⁺ Deterioration Parameters			
RESPONSIVENESS	Alert, cognition normal for resident	Not alert, but responds to voice	Responsive to pain only OR Newly unresponsive OR Sudden change in mental state
PAIN	Nil, or tolerable with or without analgesia	Observable discomfort despite analgesia	Highly distressed despite analgesia
BLOOD GLUCOSE (MMOL/L)	6 mmol - 15 mmol <i>(or range specified by GP for resident)</i>	4 mmol - 5.9 mmol or <4 mmol but responsive to treatment or Persistently >15 mmol in well resident	< 4 mmol AND unresponsive to treatment or Persistently >15 mmol in unwell resident

EDDIE ⁺ Deterioration Parameters			
O ₂ SATURATIONS	92-100% with or without O ₂ <i>(or normal for resident)</i>	88-91% with O ₂ given	<88% with O ₂ given
RESPIRATORY EFFORT	Typical for resident	Abnormal breathing, laboured or noisy, not typical for resident	Distress and/or cyanosis with oxygen
TEMPERATURE	35.6°C - 37.4°C	35°C - 35.5°C or 37.5°C - 39°C <i>Temperature Baseline +1.5°C</i>	<35°C or >39°C
